

MCCORMICK, PAULDING & HUBER LLP

INTELLECTUAL PROPERTY LAW

*Protecting intellectual property and realizing its full potential require the same care and consideration as other vital aspects of a business.*

## McCORMICK, PAULDING & HUBER LLP

*A firm having a specialized practice.* McCormick, Paulding & Huber LLP has a history as a full-service intellectual property law firm that can be traced back more than 100 years. Today the firm continues to practice exclusively in this specialized area of the law with offices conveniently situated in two locations: Hartford, Connecticut, midway between Boston and New York; and Springfield, Massachusetts, midway between Boston and Albany. Both locations offer easy access by air, rail and interstate highway, and provide comprehensive service to a host of domestic and international clients.

| Partners, associate attorneys, paralegals and support staff reside at both locations. All partners and associate attorneys are members of the bar of one or more states, are registered to practice before the United States Patent and Trademark Office, and collectively hold degrees in a wide range of engineering and scientific disciplines. | Whether your company is an entrepreneurial start-up or multinational conglomerate, the firm offers a full range of services in intellectual property matters throughout the United States and around the world. Working relationships with highly qualified law firms in every major U.S. city and in more than fifty foreign commercial centers, provide you with intellectual property services unconstrained by regional or national boundaries.

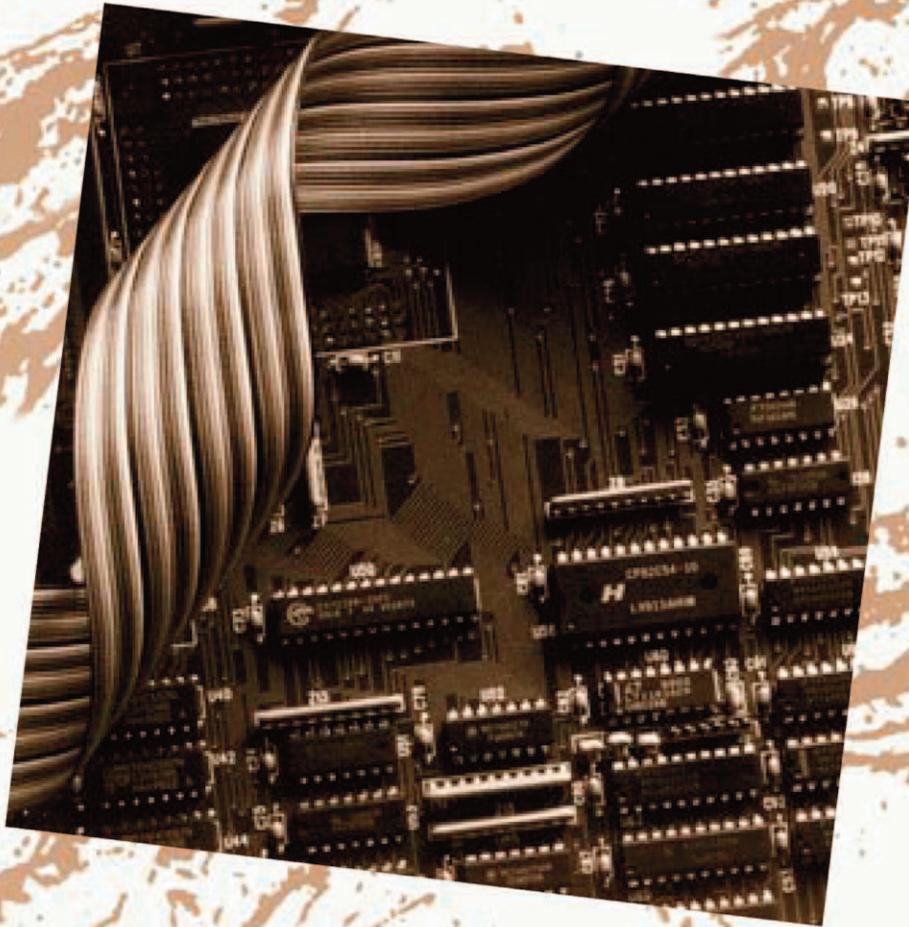

*The complexities of  
acquiring, protecting,  
and transferring  
intellectual property  
should be entrusted only  
to professionals.*

## GENERAL AREAS of PRACTICE

*Patent practice*, more than any other field of law, requires a merger of legal and technical expertise. With general law degrees, specific training in patent law, and scientific and engineering degrees, our attorneys can communicate directly with you and your staff on technical and legal matters, and apply their skills comprehensively in seeking the most effective forms of legal protection for your specific needs. The same skills are employed in obtaining relief in the courts for infringement of your patent rights as well as defeating unwarranted claims of infringement brought against you by others.

| Technical disciplines represented by our staff are diverse and comprehensive. From microchips to microorganisms, your invention will be entrusted to a knowledgeable attorney. Our disciplines include:

- Aeronautics and Astronautics
- Automotive and Transportation Technology
- Biotechnology
- Chemistry and Chemical Engineering
- Computer Science and Software
- Control Systems
- Electrical Engineering
- Financial and Insurance Products
- Firearms and Weapon Systems
- Fuel Cells
- Heating, Ventilating, Air-Conditioning and Refrigeration Systems
- Internet Technology
- Medical Engineering
- Medical Devices
- Metallurgy, Composites, Polymers and Material Science
- Motion Picture and Video Technology
- Naval and Marine Engineering
- Package Engineering
- Pharmacology
- Physics, Optics, Lasers, Fluidics, Magnetics
- Power Generation and Distribution Technology
- Semiconductor Device Manufacturing
- Structural Engineering
- Telecommunications

*The practice of  
intellectual property law  
requires a merger of law  
and technology.*

---

*In litigation involving a foreign patent owner with an exclusive licensee in this country, our client faced the prospect of an injunction in his most promising new product line. We were able to find prior art anticipating our adversary's patents in broad concept, but the projected result of litigation remained in doubt. Discovery was conducted rigorously and on the eve of trial our opponent began to grow weary of the battle. After a difficult three-way negotiation with both the foreign patent owner and the U.S. licensee, the litigation was settled with our client receiving a license under the patents. The license allowed our client to become a leader in the product line involved in the litigation.*

---

*Trademarks* have become increasingly valuable assets in franchising, on the internet, and in virtually every other business. Based on knowledge of the law and practical experience, we help you select, properly use and register those marks which provide recognition of and demand for your goods or services in the marketplace. We advise you and take the legal steps necessary to protect your marks against infringement or dilution by others. We also defend against claims involving trademark usage which are brought against you by others.

---

*Our client operated an agricultural catalog store catering to poultry, dairy, and cattle farmers. One of his products was a plain sheet of plastic stock cut to selected sizes for use in building animal pens, floors and gutter lines. The product was very popular, and the client wanted a proprietary position to assist him in the marketplace. We studied the product and determined that patent protection was unavailable. We also advised him, however, that the trademark which he had been using could be registered. Today he markets the product as his own exclusive brand under a federally registered trademark.*

---

*Effective solutions to  
intellectual property  
problems are based on  
sound business principles.*

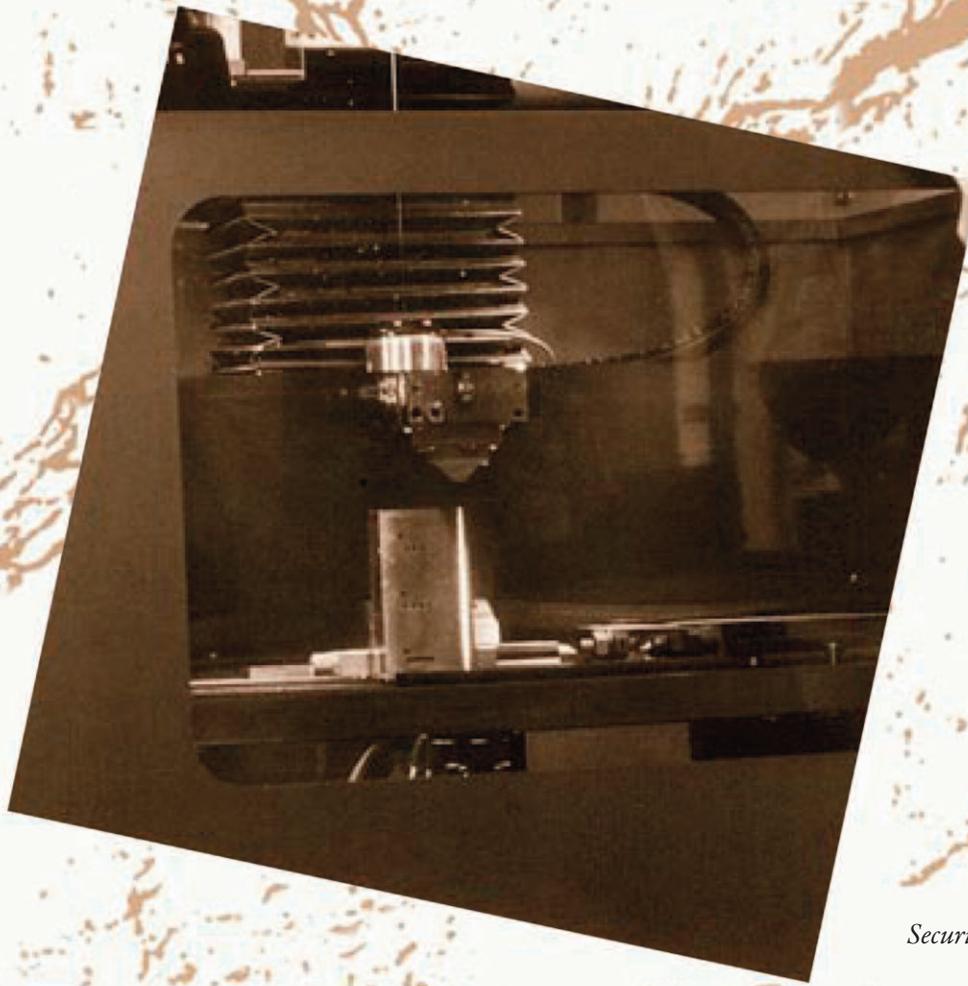

*Copyright*, as the customary method of protecting works in the arts and entertainment field, assumed a significant new dimension in 1978 when computer software was expressly included within its protection. As courts and legislative bodies struggle with this continuously developing field of law, our firm follows each progression of theory and practice to counsel clients in accordance with current legal doctrine.

---

*A client referred to us by another attorney had received a Summons and Complaint charging him with infringement of the plaintiff's copyright on a computer program. During the discovery phase of litigation, we established that the copyrighted work was a derivative of works created under a government sponsored grant which had been carried out by our client in collaboration with the plaintiff's predecessor. Once this information was incorporated in our client's amended Answer, the plaintiff promptly initiated negotiations toward a settlement which would allow our client to continue marketing his product under a royalty-free license.*

---

*Trade secrets*, when properly identified and preserved, provide proprietary positions that last indefinitely. Often trade secret difficulties arise from an employer-employee relationship. We understand the technical, legal and business issues which accompany these difficulties and have the skills to fashion remedies that address the complexities of this area of law.

*Securing protection for  
intellectual property  
starts with a thorough  
understanding of the  
applicable law.*

*Unfair competition* actions handled by our firm extend to broader improprieties involving intellectual property such as unfair trade practices, false designations of origin, trade dress simulation, trade libel, and false advertising.

---

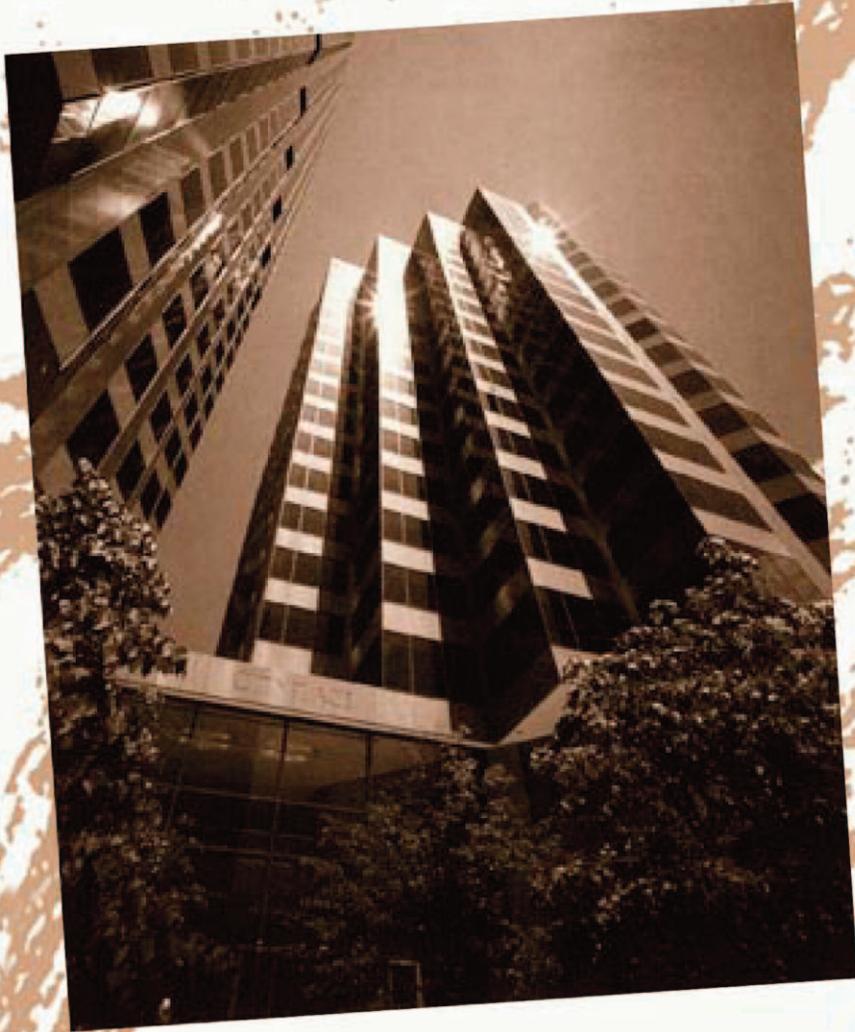

*The client had devised an improvement to a moderately priced consumer product and was sued by the originator of the product for trade dress infringement, false designation of origin and trade secret violations. We were able to show at trial that the product similarities were due solely to unprotected functional aspects of the products. The District Court found for our client on all counts. On appeal the First Circuit Court of Appeals was asked to remand the case because of the trial court's failure to ascribe to our client the burden of proof with respect to product confusion in the marketplace and secrecy of the competitor's dealer list. We were able to persuade the Court of Appeals to sustain the trial court on both of these issues in spite of the fact that the confusion issue had never been decided by the First Circuit.*

---

## LEGAL SERVICES

*Intellectual property disputes.* Our firm has attorneys and support staff with practical experience in the resolution of intellectual property disputes through negotiation, arbitration or litigation. Key to our efforts in seeking a most favorable resolution is a thorough understanding of the technical issues and applicable law, as well as sensitivity to your desires and goals.

*Procurement.* Procuring domestic and international protection for a patentable invention, a trademark, or an artistic creation, is a highly specialized skill we have acquired through years of practical experience.

*Diverse and  
comprehensive skills  
acquired from years of  
experience assure you the  
most effective strategies  
for success.*

In consultation with you, we recommend and seek the type of intellectual property protection which most appropriately addresses your individual requirements.

*Technology transfer.* As domestic and world markets become more closely integrated, the exchange of technology and other proprietary property has become more common and, in some cases, indispensable for survival. Licenses and other transfer agreements have been common work products for us for many years. We take pride in our ability to guide our clients through complex licensing negotiations.

---

*McCormick, Paulding & Huber LLP* represents multinational corporations as well as small to medium size companies and individuals who are located both in the United States and abroad. A high standard of professional service is maintained by sustained partner involvement in the work performed for every client. | Our extensive information retrieval systems offer immediate access to a wide spectrum of technical and legal databases for up-to-date, substantive analysis for your position and that of your adversary. Our goal is to develop effective and successful strategies for you by applying legal and technical skills to your business.

#### **Experience**

Geoff has extensive experience in domestic and foreign patent prosecution, license negotiation, and litigation, particularly in pharmaceuticals and the life sciences. He has represented major pharmaceutical companies, start-ups, and universities.

He practiced patent and licensing law with Johnson & Johnson, becoming the lead patent attorney for the pharmaceutical sector of the company and a member of the management board of the subsidiary Janssen Pharmaceutical, Inc. He then became Intellectual Property Counsel for Warner Lambert Company, in which position he managed the global intellectual property needs of the company. Following Warner Lambert, he rejoined Johnson & Johnson's principal pharmaceutical research and development subsidiary, where he created and managed a patent and licensing team that assured the legal conformance of the subsidiary's activities, prepared and managed its patent portfolio, represented it in licensing transactions, and negotiated research and technology acquisitions and relationships. He was then senior consultant for Columbia University, where he advised on technology transfer and licensing operations at its Medical Science Campus. Most recently, he was Associate Professor and Supervising Attorney for the Intellectual Property Law Clinic at the University of Connecticut School of Law.

Geoff is licensed to practice before the state courts of Connecticut and New Jersey, the Court of Appeals for the Federal Circuit, and the United States Patent and Trademark Office.

### **Sergio F. Chung**

#### **Associate**

##### **Education:**

- B.S., Mechanical Engineering, Massachusetts Institute of Technology
- J.D., Boston University School of Law

##### **Experience**

Sergio's practice focuses on patent litigation and patent prosecution/client counseling in the fields of telecommunications, electronics, semiconductors, business-methods, electronic commerce, medical devices, industrial equipment/machines, packaging, and consumer products. Sergio's experience includes developing patent assets for assertion and licensing programs; preparing and prosecuting patent applications in the U.S. and abroad; representing clients in patent infringement suits; providing patentability, invalidity and non-infringement opinions; evaluating intellectual property assets in the context of litigation, mergers, acquisitions, and investments; and providing intellectual property due diligence for various types of transactions. Additionally, prior to obtaining his law degree, Sergio acquired significant experience working for a leading IP research and analysis firm. Among other things, Sergio conducted patent validity, freedom-to-operate, and patentability research. He also researched and analyzed the patent landscape in particular technology areas to help clients make key R&D decisions, evaluate acquisition opportunities, identify business opportunities, and create valuable IP portfolios.

### **Mallory Hein** **Associate**

#### **Education**

- B.A., Political Science, College of Charleston
- J.D., Quinnipiac University School of Law

#### **Associations**

- American Bar Association

#### **Experience**

Mallory has experience with conducting and analyzing trademark availability searches, filing and prosecuting U.S. trademark and service mark applications with the U.S. Patent and Trademark Office, as well as prosecuting opposition, cancellation, and other proceedings before the U.S. Trademark Trial and Appeals Board. She also has litigation experience preparing and responding to Discovery Requests and with Motion Practice, generally. Mallory has extensive experience with new generic top-level domain name (gTLD) applications and brand protection in connection with new gTLD applications. Mallory worked as a contract lawyer for a Fortune 200 Company where she gained experience in domestic and foreign trademark enforcement and brand protection, the prosecution of new gTLD applications and the assessment of trademark portfolios for the submission of trademarks to the Trademark Clearinghouse, as well as copyright clearance/infringement review. Mallory is admitted to practice before the state courts of Connecticut.
